## TUMMERS CONNECT

**U**nlock the future of machine management with Tummers Connect – your all-in-one online dashboard revolutionizing the way you oversee your equipment.

Accessible through a simple QR scan or app login, Tummers Connect puts the power of machine management at your fingertips. From manuals to spare parts ordering, service history to support, and even initial setup options, Tummers Connect ensures you're always in control.

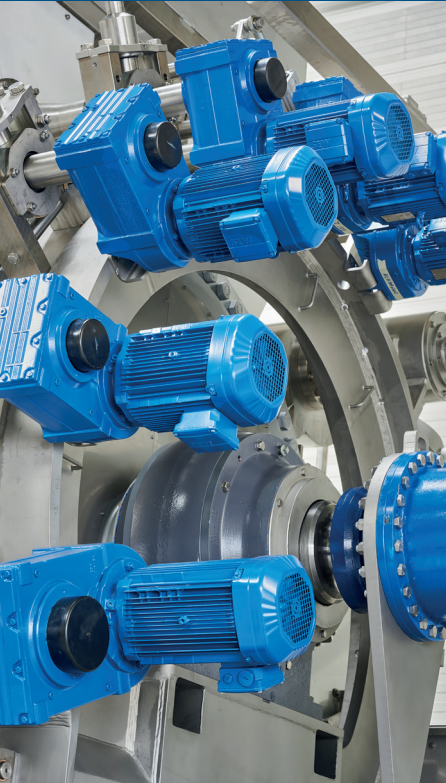

But that's just the beginning. Our vision for Tummers Connect extends far beyond its capabilities with release. With future plans for predictive maintenance, process analysis tools, remote support, and more, this platform is designed to grow with your needs.

In collaboration with Siemens, a trusted leader in process automation, Tummers Connect combines cutting-edge technology with decades of expertise to deliver unparalleled performance and reliability.

## KEY FEATURES

- **Secure Connectivity:** State-of-the-art encryption ensures your data remains safe and secure.
- **User-Friendly Interface:** Intuitive dashboard design makes monitoring and managing your machines a breeze.
- **Compatibility:** Designed to support a wide range of machines within the food and beverage industry.
- **Scalability:** Easily adapts to accommodate your business's growth without sacrificing performance.

## BENEFITS FOR YOU

- **Operational Transparency:** Gain full visibility into machine operations for informed decision-making.
- **Cost Savings:** Reduce energy consumption and waste, leading to significant long-term savings.
- **Quality Assurance:** Maintain consistent product quality by monitoring critical parameters and industry standards compliance.
- **Higher Efficiency:** Utilize predictive analytics to stay ahead of potential machine failures, minimizing downtime with proactive maintenance.

Experience the future of machine management with Tummers Connect. Get ready to streamline your operations and maximize efficiency like never before. Stay tuned and follow us for the latest developments.
