HarvestEye™
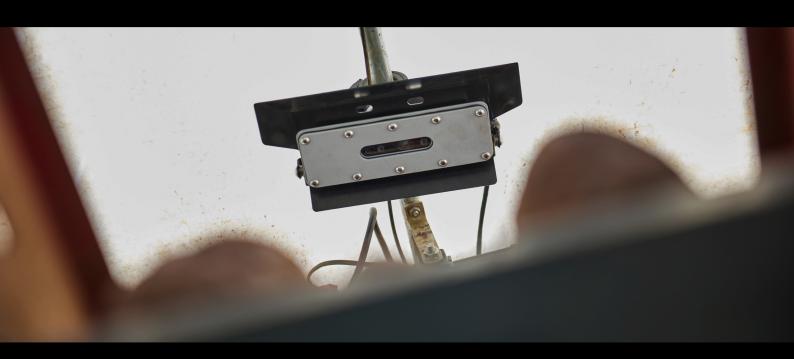

HarvestEye™ is a unique system that provides live information on root crops as the crop is harvested. The technology gives valuable information on the whole field instead of conventional sampling.

Optimise Yield

Data Driven Decision Making

Cutting Edge Machine Learning

Maximise Returns and Avoid Waste

HarvestEye

All new Handheld

- Instant Sizing
- Portable
- Customisable reports
- Marketable Insights

Discover the future of farming with the HarvestEye Handheld – where precision meets practicality.

The HarvestEye Handheld offers precise, real-time insights into crop performance. This portable device captures detailed sizing data on root vegetables, enabling you to digitise your test dig process with unmatched accuracy. Its user-friendly interface and robust design make it perfect for in-field use.

Hear from our current customers!

George Nairn
Branston Ltd.

"The accuracy of HarvestEye data enables us to find and forecast size distribution, allowing us to take necessary steps to mitigate any over or under supply coming our way earlier than conventional methods."

Adam Jay
Gerrit Visser & Sons

"We are working with HarvestEye to generate real-time data that we can use to make data driven decisions and improve productivity."

Sam Rix
P.G. Rix (Farms) Ltd

"HarvestEye has given us detailed understanding of sizing of our whole harvested crop enabling us to have data driven conversations with our customers."
